

Incident Response: Your Organisation Has Been Hacked, Do You Have A Response Plan?

If your answer is yes, do you test it regularly? If no, the answer is now. No organisation is immune to cyber attacks and it can happen anytime and anywhere. Prevention is key but knowing how to react immediately and manage a breach is another thing altogether.

“87% of organisations responded to at least one incident in the past year”
- Sans Incident Response Survey, 2017.

PRAGMA INCIDENT RESPONSE LIFECYCLE

OUR INCIDENT RESPONSE MANAGEMENT SERVICES

Our goal is to ensure your organisation is ready to respond to an attack and recover from an incident with minimal disruption to your operational activities.

Incident Response Planning

If your organisation does not have the capability, time or technology to strategise an effective plan, Pragma's Incident Response Planning will help your organisation design and test a well-positioned incident response plan from detection, containment to recovery. We will be your Cyber Incident Response Team (CIRT).

Benefits

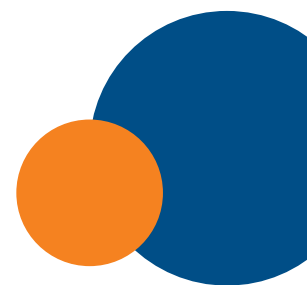

- Improve internal coordination
- Standardise procedures for incident response
- Minimise impact of a cyber breach
- Gain clients' and investors' trust and confidence

Incident Response Team

Hit by a breach and need help? Our certified Cyber Incident Response Team is available 24/7 to support your organisation when a breach occurs. We are trained to understand threats and contain them quickly to get your organisation back to business faster.

Benefits

- Contain the threat in 48 hours
- Remote response within 15 minutes
- Investigation and root cause analysis to determine underlying cause

498 Days

The average number of days an attacker stays present in victim's network before detection in APAC.

M-Trends 2018

Internal vs External

"Businesses who detect breaches on their own or in partnership with a managed CIRT were often able to respond to breaches faster as compared to businesses who rely on information from outside parties."

Please contact us immediately if you are experiencing a breach or wish to learn more about planning an effective incident response.
