

The Power of Identity: Complete Visibility Of User Access

A robust and singular IAM (Identity and Access Management) platform enables the right individual to access the appropriate resources at the right time, while keeping unauthorised individuals away from sensitive resources.

1 in 7 employees are willing to sell their login credentials for as low as \$150.
– SailPoint.

89% of IT security professionals recognised that infrastructure and critical data are not fully protected unless privileged accounts, credentials and secrets are secured and protected.
– CyberArk

THESE ARE COMMON PROBLEMS FACED BY ORGANISATIONS THAT LACK CONTROL IN THEIR ACCESS MANAGEMENT

- IT helpdesk spends too much time helping employees with managing access or password related issues
- Excessive access to confidential data by third parties
- Slow onboarding process for new employees
- Experienced a breach caused by an insider with excessive user access

HOW CAN IAM HELP YOUR ORGANISATION?

- ✓ **Meet compliance and improve audit performance**
Automation and efficiency in generating common audit reports that meet strong compliance standards.
- ✓ **Improve user efficiency**
A streamlined access delivery reduces errors and time for access requests.
- ✓ **Reduce IT Operational cost**
End users are enabled with access and password management capabilities, hence reducing headcount for helpdesk.
- ✓ **Improve security**
Ability to take action on vulnerabilities in real time, automated policy checking and periodic access reviews.

Secure Identities = Secure Data = Competitive Advantage

PRAGMA IAM SERVICES

1 Managed Services for IAM

Our security specialists act as an extension of your security operations and manage your IAM system with a focus on security, continuous improvement and meeting organisation goals. We provide cloud hosting IAM monitoring, testing and resolving deployments and updating patches and features.

Reduce On-site IT Employees • Reduce Operational Overheads • Proactive System Maintenance

2 Operational Support

We operate as your IAM helpdesk and provide root cause identification for IAM issues whenever needed or in the event of a data breach.

Improve Issue Resolution Speed • Quick Access To Expertise

Our partner:  **SailPoint**  **CYBERARK**

Talk to us now to improve your access management.
